Coating

Brief Introduction

PE(polyester) Coating

PE(polyester) coating:high molecular polymer as monomer and addition of alkyd, is an UV-resistant coating. It can be classified matt and glossy according to coating gloss. The compact molecule structure, makes paint surface luster and smooth, which assure good printing on the panel surface. With an warranty of 8-10 years for weather resistance, it is specially applied for internal decoration and sign board.

Standard colors: more than 50 colors

Not standard colors can be customized according to customer's requirements

PVDF(fluorine-carbon) Coating

PVDF(fluorine-carbon) coating :made of fluorine carbon resin, pigment, ester solvent, after high temperature roasting and baking, the paint is solidified to dry film with super weather resistance. PVDF coating also can be classified as traditional PVDF and nanometer PVDF coating.

A. **Traditional PVDF Coating**, with KYNAR500 PVDF, two or three times for coating and baking, has good properties of anti-acid, anti-alkali and is durable in atrocious weather and environment, keeping 15 years no unwonted fading. In view of these facts, we recommend this panel applied for external wall cladding.

B. **Nanometer PVDF Coating**, which different with traditional PVDF is the clear coating. It contains nanometer element, which can protect panel from pollution, Because nanometer has self-cleaning effect, It easy to get rid of dust and pollution by raining or water.

Chameleon Colors Coating

Add pearl talc into PVDF paint(>70% PVDF),depending upon the pigment type and viewing angle, different wavelengths of light are reflected, refracted and diffracted to the audience resulting in an ever-changing color gradient with iridescent highlights. It is widely used for public internal and external, multiple shops, exhibitions and so on.

FEVE Coating

Which is a high quality paint for one or more coatings, with polyurethane as base, fluor polymer as top coating to keep its good weather resistance of 10 years. Compared with PVDF, it guarantees more fresh and vivid color and high gloss retention. Its creativity and individuality offer unlimited possibilities for the planner. It is available in colors that are not feasible with other coating systems.

Special Colors Coating

A. **Brushed panel**, which are made some special process on natural aluminum, presents the nature and beautiful appearance together with modern and elegant.

B. **Granite panel** can be processed by film-sticking and painting. The former means stick one layer of film with granite pattern, it is very easy. And the latter is painted and roasted for three or four times with a better weather resistance.

C. **Mirror finish panel**, which need anodic oxidation finishing on aluminum surface, the finishing makes the surface like mirror. It is more safely using and processed to all shapes.

D. **Two colors in one sheet**. We renew the coating system and technology and break the national single color to appear two different colors in same panel, it offers more , more imagine and creativity.

Service Procedures

Color Match

Supply a physical sample of custom color. A color sample on metal is preferred, but if other, it is also acceptable, but the color matching rate maybe not good as color on metal.

New color sample is usually offered by our paint supplier in 5-7 days, special color should be in 7-10 days.

Upon receipt of color sample, please approve in writing as soon as possible. Once you approve, we will arrange purchasing and production.

Color difference maybe occurred in different production batch, so it is suggested all panel are placed in one order for same project. And keep same direction as arrow on protective film when installing to avoid any color difference by vision.

Certificate

Kynar 500 certificate for Becker

Kynar 500 certificate for PPG

The first ACP advertising system supplier of China.

The signage material supplier for 2010 Shanghai World Expo

The material supplier for Sino-pec Gas Station

The material supplier for McDonald's

The first Chinese ACP manufacturer passing PSB test

Pass Swiss SGS test

Be certified with Germany Rhine TUVISO9001 Quality Management System

Cooperate with 3M and PPG
