QUALITY

- 1 Standardized production flow: large-scale production, modern facilities, collectivized operation management, 5S management over depository and workshop, and all these guarantee high quality of IBOND.

- 2 Pivot quality standard higher than China ACP industry standard: we use raw materials of international brands, and have a strict control over panel surface, so the panel is of good quality, strong mechanical strength and high standard.

- 3** Inspection and supervisory control during the whole production process: there are various inspections, including quality inspection of raw material, on-line inspection and quality inspection of finished product. And all the inspection results will be recorded and filed in detail.

- 4 Plenty of certifications and quality assurance: our products have passed ISO9001, Russian Fire Resistance Test, Switzerland SGS, Singapore PSB Nanometer Test, Kynar500 Identification: BECKER, Kynar500 Identification: PPG, American ASTM and certifications of many European countries.

- 5** Professional quality testing personnel and testing equipment: all our quality-control personnel hold a qualification certificate and we have whole set of advanced quality testing equipment.
- 6** IBOND ACP is environment-friendly , nontoxic and of perfect quality. IBOND has very good peeling strength and weather resistance. The PVDF coating can be guaranteed for 15-20 years, PE coating for 5-8 years and AR 500 coating for 10 years.
